Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 October 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-15, 17-24 and 26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rebierre.
3. Rebierre discloses the invention as claimed where: **10** is a base connected to elongate measuring members **300**; elongate measuring members also operate as mechanical sensors that mechanical sense and provide a visual indication of the displacement distances of measuring members **13**; and **5** is an optical sensing device which has sensing structure as claimed for determining the displacement of the elongate measuring members **300**.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2859

5. Claims 7, 16 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rebiere in view of Bryant.

6. Rebiere discloses the invention substantially as claimed. However, Rebiere does not disclose to use different codes for the elongate measuring members. Bryant discloses to use different codes on elongate measuring members **31** for the purpose of identifying the individual displacement members. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use codes as taught by Bryant in conjunction with the device of Rebiere for the purpose of providing the elongate measuring members of Rebiere with displacement information (i.e. displacement member identification).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
